

Are you ready for the government's rural heating plans?

From 2026 you will no longer be able to install a new fossil fuel oil boiler in your home and new regulations may require you to switch to a heat pump - which could cost you around £11,000

We're trialling a **DIFFERENT** way

HVO is a renewable liquid fuel for your home

- ✓ Hydrotreated Vegetable Oil
- ✓ Works just like heating oil
- ✓ Reduces carbon emissions by up to 90%
- ✓ Low upfront cost and limited disruption
- ✓ Made from fossil free sustainable waste materials
- ✓ Currently being used in over 100 homes as part of a live demonstration

Visit our website: www.futurereadyfuel.info

Let's have heating choice

With your help we can encourage the government to provide a heating choice for off-grid homes like yours

Join the **Future Ready Fuel** campaign to voice your opinion and secure your home's future today

Four simple steps to Future Ready Fuel - act now!

1. Visit our website at www.futurereadyfuel.info
2. Download our template letter supporting HVO
3. Update the letter with your details and thoughts
4. Email (or post) the letter to your local MP

Thank you... and spread the word!

Thousands of people have already joined the campaign to secure a fair, renewable future for rural homes.

Visit our website at www.futurereadyfuel.info to learn more about the campaign and the 100 homes currently trialling HVO.
